## EMBO reports – [embor.embopress.org](http://embor.embopress.org)

**FOCUS:** Original research articles, reviews and commentary.

**SUBJECTS COVERED:** All areas of molecular biology. Also features a Science & Society section that publishes articles and essays on the impact and application of science: uses and abuses of science, communication and education, policy and practice.

### OVERVIEW:

Format:	PDF
Publication Frequency:	3-4
Volume:	1
Impact Factor:	10.4

Geographical Breakdown of Online Readers:	USA 48%
eTOC subscribers:	10

## Molecular Systems Biology – [msb.embopress.org](http://msb.embopress.org)

**FOCUS:** An open access journal that publishes original research in the multidisciplinary areas of systems biology and synthetic biology. The journal focuses on the analysis, integration and modeling of molecular and cellular processes. Its review section provides accessible overviews of the latest advances.

**SUBJECTS COVERED:** Integrative genome-scale biology, quantitative biology, computational biology, metabolic and regulatory networks, evolution of genomes and biological networks, clinical and translational systems biology, synthetic biology and genome-scale biological engineering.

### OVERVIEW:

Format:	PDF
Publication Frequency:	10
Volume:	1
Impact Factor:	11

## EMBO Molecular Medicine – [embomolmed.embopress.org](http://embomolmed.embopress.org)

**FOCUS:** A broad scope open access research journal dedicated to the interface between clinical research and molecular cell biology. All studies are characterized by direct relevance for human diseases; work based on model organisms is included within the scope of the journal.

**SUBJECTS COVERED:** Aging, angiogenesis, cancer biology, channelopathies, transcriptomics, proteomics, metabolomics of disease, systems medicine, gene therapy, immunology, sensory defects, stem cells and regenerative medicine, vascular and cardiovascular biology

### OVERVIEW:

Format:	Online only
Publication Frequency:	12 x year
