About Wiley *Life Sciences*

Fundamental to scientific communities

We've been meeting the information needs of scientific communities since 1807. As a global publisher our focus is on assuring that accurate, proven knowledge is readily available to all life science *communities*.

Wiley specializes in practical knowledge written by leading experts, and organized and edited by the most skilled science editors working today. Our portfolio of reference, protocols, and journals serve professionals in the biotech, biomedical, and life science industries. We're the world's largest society publisher, partnering with prestigious scholarly societies. **Our reach is deep.**

Wiley is integral to life science research. We provide the resources on which scientists rely for their research. Now, with our new digital initiatives, we have expanded our capabilities and are offering more ways to share important information, and support the unceasing pursuit of knowledge.

The cycle of knowledge

Research begins with curiosity, a fundamental human trait that ultimately leads to discovery.

And, publication of the discovery happens next. But once a discovery is published, the next logical step in the cycle is to apply that knowledge to the tools of continued research — through commercialization.

As a leading knowledge provider, we understand the cycle of knowledge.

Supporting research

Wiley is the world's leading society publisher partnering with 900+ professional societies and more than 2 million members.

Our focus on professional societies provides us with unique access to life science research communities. A society journal is a hub within the community. Sponsoring society journals provides exceptional access to opinion leaders, experts and academics. We are proud to be an influential member of the audience we serve.

Wiley is a global publisher with offices in every major country. We have the highest number of journals ranked by Journal Citation Reports in 53 categories.

Of the 879 Nobel laureates recognized, we have published content written by 476 — more than half! Many of our journals are ranked with the highest impact factor in their subject category.

A sampling of the renowned professional societies with which we partner:

Current Protocols is a series of laboratory manuals that provides detailed instructions for life science experiments. Established in 1987, the series comprises more than 25,000 peer-reviewed protocols across the program, with an editorial board of world-renowned experts. Top echelon scientists write protocols describing methods that are fundamental to major biological research disciplines. The authors are leaders in their fields, and some are Nobel Prize laureates. New protocols are published continuously on-line, with new issues released monthly.

The *Current Protocols* portfolio shares best practices from top labs worldwide. They are the most complete set of peer-reviewed protocols available, combining basic to advanced techniques with detailed discussion of objectives and expert guidelines.

- Nearly 25,000 peer-reviewed protocols
- Written and edited by leading scientists
- The world's leading collection of peer-reviewed and updated laboratory protocols

Current Protocols enables researchers at all levels to conduct **successful** and **reproducible experiments** by providing expert-written and proven step by step protocols, saving researchers **valuable time and resources**.

Universities provide their postdocs and students with access to **Current Protocols** for step-by-step guidance on fundamental laboratory procedures

Government and private research institutes rely on **Current Protocols** to ensure performance of standardized procedures for reproducible results

Pharmaceutical laboratories trust **Current Protocols** to assure harmonization of laboratory procedures across multiple facilities and locations.

Target audience

The target audience for *Current Protocols* includes anyone interested in conducting research in the life sciences. Sufficient detail is provided to permit duplication of the protocols in any laboratory, whatever the disciplinary background and level of sophistication.

Top 4 countries by usage are United States, Germany, England and China.

Current Protocols provides highly detailed instructions for performing life science laboratory techniques
